

# Oregon's Energy Future Workshop Series

## Transportation

**November 18, 2021**

*An NEBC Virtual Event*

The second in a three-part series of interactive workshops, Transportation will focus on the bold steps our region is taking to advance electric and smart mobility to reduce greenhouse gas emissions, foster social equity and inclusion, and strengthen resiliency on Oregon's path to decarbonization and a clean energy future.

**8:00 - 8:30**      **Opening Keynote** - Jesse Jenkins, Assistant Professor, Princeton University

**8:30 - 9:30**      **Oregon: GHG Footprint for Transportation and Lay of Land**

*This session will dig into the transportation sector greenhouse gas footprint and progress towards decarbonization to date.*

Moderator: Brien Flanagan, Shareholder, Schwabe Williamson & Wyatt PC

Panelists: Meredith Connolly, Oregon Director, Climate Solutions; Kate Hawley, Electric Vehicle Senior Product Manager, PacifiCorp; Matt Leasure, Director of Pacific Northwest, Policy Committee on Transportation and Infrastructure, Chairman Peter A. DeFazio

**9:30 - 9:45**      **Break**

**9:45 - 10:45**    **The Next Phase of EV Charging: Needs, Policies, and Opportunities**

*This panel will examine Oregon's electric vehicle charging infrastructure needs, discuss what's working in other states, and consider opportunities for Oregon to achieve broad electric vehicle charger deployment.*

Moderator: Jessica Reichers, Energy Technology & Policy Manager, Oregon Dept. of Energy

Speakers: Mary Brazell, Transportation Electrification Program Manager, Climate Office, Oregon Dept. of Transportation; Sarah McKearnan, Senior Manager, Clean Transportation, Northeast States for Coordinated Air Use Management (NESCAUM); Adam Mohabbat Market Development Manager, EVgo; Stephanie Reiter, Senior Product Portfolio Manager, PGE

**10:45 – 11:45**    **Beyond Transportation Electrification: Alternative Fuels for Decarbonization**

*Alternative fuels like renewable diesel and renewable natural gas are playing a critical role in decarbonizing Oregon's transportation sector today. Looking forward, we can expect that renewable alternative fuels like renewable propane and renewable hydrogen will take on a larger role. This panel will discuss the current landscape of alternative fuel use in Oregon and what we can expect in the future.*

Moderator: Michael Graham, Deputy Director, Columbia-Willamette Clean Cities

Speakers: Keith Wilson, President & CEO, Titan Freight Systems; Kate Lyman, Manager, Service Planning and Development, TriMet; Gregg Thompson, Maintenance Manager, Cherriots; Cory Ann Wind, Oregon Clean Fuels Program Manager, Oregon Dept. of Environmental Quality

**11:45 - 12:00**    **Closing**
